COULD BE a classic arcade masterpiece.BUT THE DIFFICULTY is unfair and MAKES ME RAGE. I got this game for \$.78 when i was on sale, but even for \$1 you don't lose much checking it out. I personally didnt enjoy the game (hence the low play time). I found the jump arc far too short to have much fun, as you had to get right next to (basically until there was clipping between the player model and the obstacle) the obstacle before you jumped. There was no variable jump, either. Idunno, this game didnt appeal to me, but it's also not the type of game I typically play. You dont lose much by checking it out, so if you're on the edge, just go ahead and buy it.. it scream at me. If this game is not worth the time it would take me to write a real review of it imagine how little it is worth your time to play it.. Doesn't matter what others tell you, this is a good game..
